

Frontend Web Development Internship (4 Weeks)

Week 1: Personal Portfolio Website

Goal: Design a fully responsive personal website.

- **Pages:** Home, About, Projects, Contact
- **Include:** Profile picture, skills section, and project cards
- Add a working contact form (frontend only, no backend)
- **Focus:** HTML, CSS, responsiveness, animations

Week 2: Product Landing Page

Goal: Create an attractive and interactive product page.

- Choose a product (e.g., smartwatch, AI assistant, app)
- Include: Product images, features, testimonials, pricing section
- Add smooth scroll, modals for product info, and theme switch
- Focus: User experience, CSS transitions, JS interactivity

Week 3: Weather Dashboard Using API

Goal: Fetch and display real-time weather.

- **Input:** City name
- **Display:** Weather, temperature, humidity, wind speed, icon
- Integrate OpenWeatherMap API or similar
- **Optional:** Show forecast or multiple cities
- **Focus:** Fetch API, DOM manipulation, JSON parsing

Week 4: UI Clone of Netflix or Spotify

Goal: Recreate the layout and visuals of a popular site.

- Clone home screen (no login, no backend)
- Use mock data for content (e.g., movies, songs)
- Ensure mobile responsiveness
- **Focus:** Layout structuring, responsiveness, component reuse
